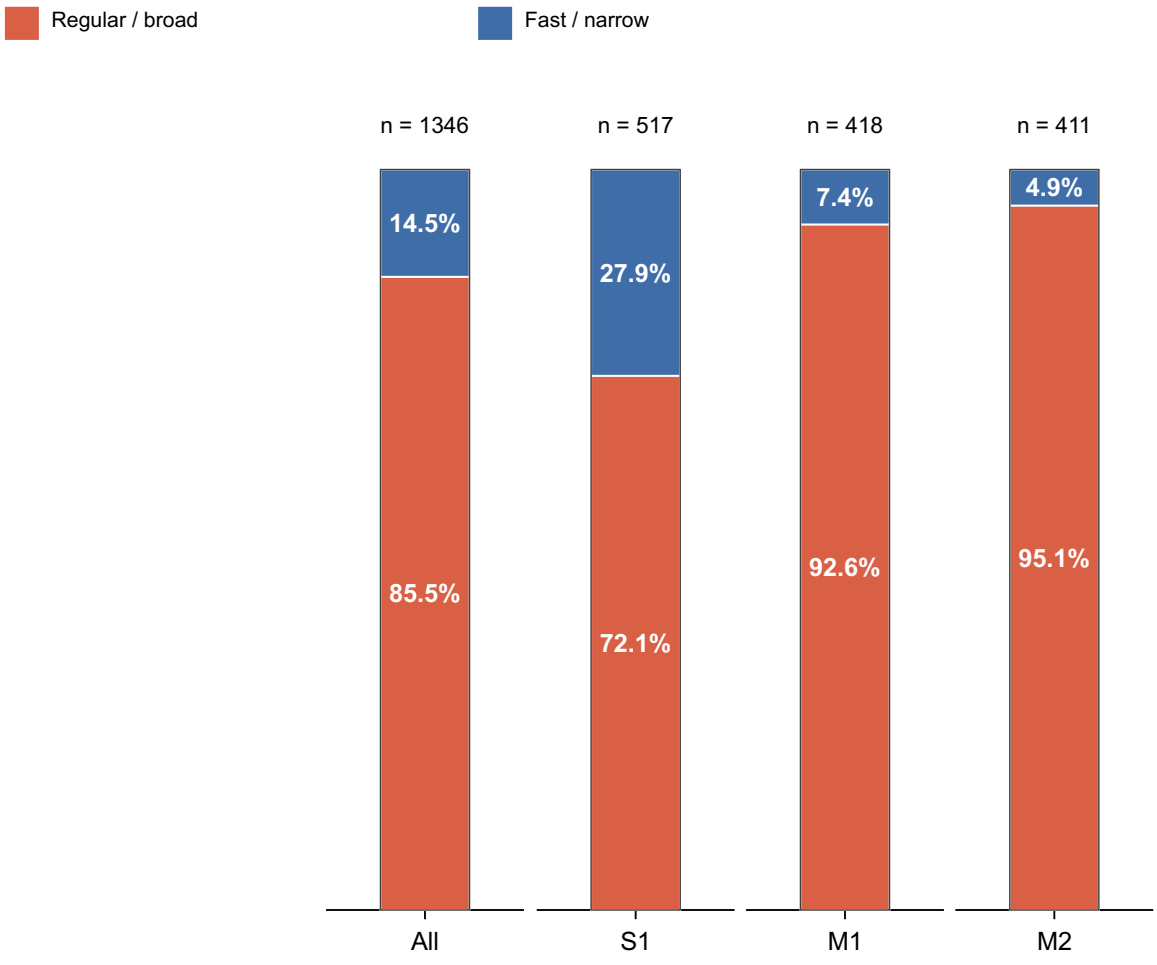
b Waveform-class composition across areas

Within-area percentages inside each segment | total neuron count above each bar



Regional omnibus: 3 x 2 Pearson chi-square, P = 3e-27.

Two-sided Fisher + Holm: S1-M1 P = 3e-16; S1-M2 P = 2.3e-21; M1-M2 P = 0.148.

All pools S1, M1 and M2. These neuron-level comparisons describe this mouse, not animal-level effects.
