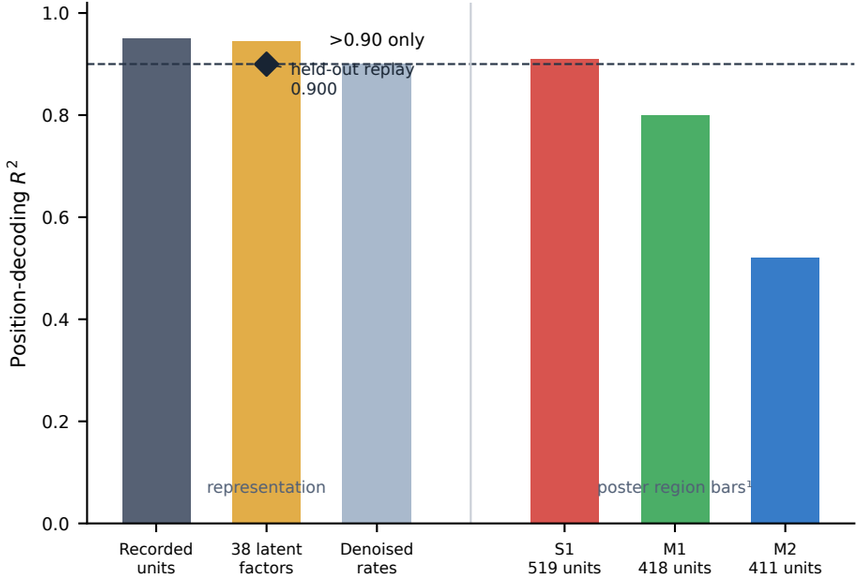
Figure 9 | Archival paw-position decoding benchmark and recoverable factor replay

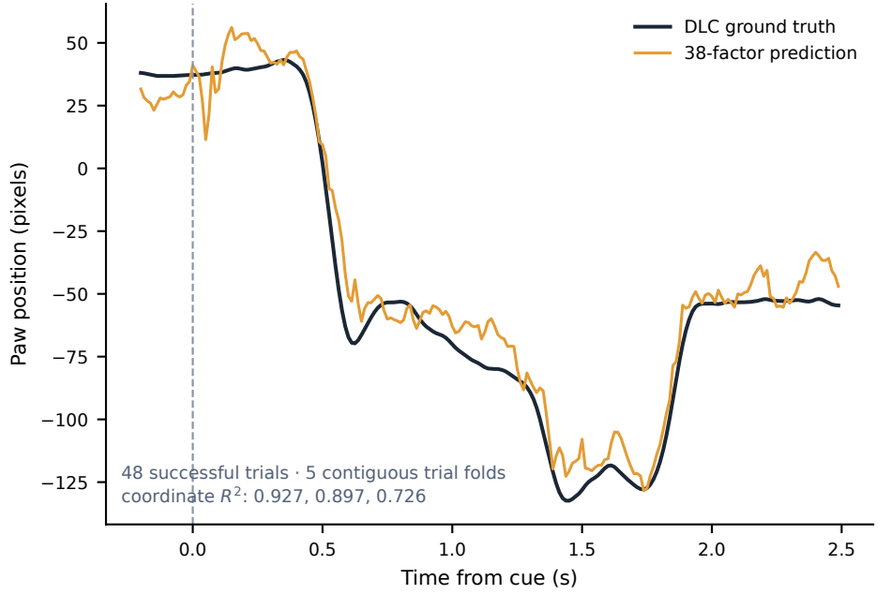
Only the recoverable simultaneous-position question is retained

B3D71 · one mouse-day · 80 Hz

a



b



¹Region heights digitized from the poster; exact numeric source and original RNN split are unavailable.

Interpretation: the archived 38-factor representation reproduces held-out simultaneous paw-position structure. Poster-only values remain approximate and are not used for inference; this figure does not test prospective information or causality.
